

FROM ASTONE

Joy'

Kibale National Park is found in Africa. It is located in Uganda which is found in East Africa.

Kibale has one of the endangered species of Primates The chimpanzees.

Do you know that Kibale chimps are named? One of the chimps is called Tabu which means danger. This is a chimp which has a crippled hand. He is a sub-adult male.

He is a brave male he moves with the high ranking males. Sometimes he is thumped and screams loudly.

He does not fear "Mobutu" the Alpha male.

I love him because he is handsome.

Long live Tabu.
