Forest

Elephants

Are there to

stay

Trust me.

Forest Elephants feast on *Balanites Wilsoniana* fermented fruits. Which is commonly called Elephant beer or call it their extra strong brew. Elephants help in the dispersal of this plant. The seeds which pass through the digestive system of the elephant gets a quicker germination.

My son what stays at the river?

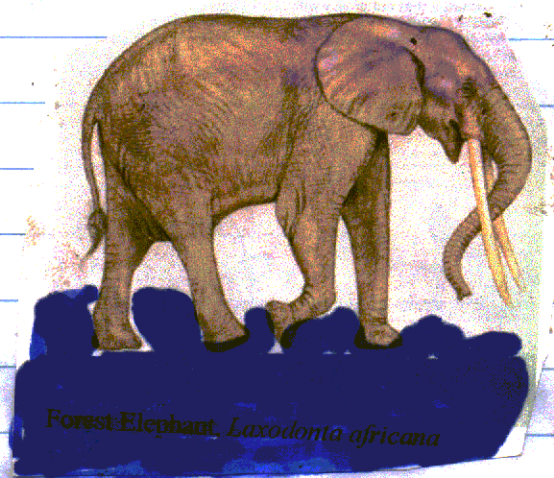

An elephant.

What is beautiful?

An Elephant

What beshames an elephant?

Its short and small tail.

from Astoria.

My nickname
is Jumbo.
